<b>INSTALLER NOTES</b>					

• Requires approximately 6–8" rear clearance	• Requires approximately 12–15" rear clearance	• Requires approximately 6–8" rear clearance	• Undermount installation	• Requires hardscape support (concrete, asphalt, or decking)	• Undermount installation
• Requires approximately 2.5" side clearance	• Requires approximately 4" side clearance	• Requires approximately 2.5" side clearance	• Requires approximately 18" rear clearance	• Not ideal for dirt or gravel installs	• Requires approximately 36" rear clearance
• Works with cabinet or deck mount	• Cabinet mount only	• Works with cabinet or deck mount	• Requires approximately 3.5" side clearance	• Spa should be drained for proper install	• No side clearance required
• For spas with radius corners >12", the XL Side Mount Bracket (48") may be required	• Confirm side mounting area is clear and structurally sound	• Compatible with many enclosed installs including gazebos and partial enclosures	• Fits spas approximately 30–44" high	• Requires approximately 18" rear clearance (on the stow side)	• Base plate must sit flat and fully supported - do not allow overhang off the slab or deck
• Confirm bracket position allows proper support across the cover seam	• Two mounting positions allow more install flexibility	• For spas with radius corners >12", the XL Side Mount Bracket (40") may be required	• Under-spa plates are secured by the weight of the spa; best when spa is already positioned on a stable, finished surface	• No side clearance required	• Spa may need to be drained for easier install
• Compatible with inground spas	• Not compatible with inground spas	• Compatible with inground spas	• Not compatible with inground spas	• Fits spas 24–38" high; not compatible with inground spas	• Optional swim spa conversion kit available (for spas 41–55" tall; requires at least 40" of rear clearance)

**IMPORTANT NOTE - CURVED / RADIUS-CORNER SPAS (Cover Valet & Cover Valet PRO)**

For spas with radius corners greater than 12", standard bracket positioning may not allow proper installation. The XL Side Mount Bracket is available (40" for Cover Valet, 48" for Cover Valet PRO). Installation requirement: the back edge of the channel bracket should sit 2" in from the back face of the spa, fastened to the side mount bracket with at least 4 bolts, and the side mount bracket fastened to the spa cabinet with at least 4 lag screws into solid backing. The XL Bracket is sold separately through Cover Valet dealers or at [covervaletparts.com](http://covervaletparts.com).
